

## Laboratori Nazionali del Gran Sasso

### Rules for schools/groups visits at the Gran Sasso National Laboratory

Available Days	Saturdays and Sundays
Length of the visit	1 hour and half
Participants	<b>Max 46 people</b> , included chaperones. <b>Minimum age 14 years.</b> <b>Only grades of the final year of high schools are accepted.</b>
Documents to deliver at the guardian box entrance before the visit	<b>➤ FOR SCHOOLS:</b> list of participants. <b>➤ FOR GROUPS:</b> list of participants, date of birth and ID number
Underground Lab Entrance	It is possible to enter the underground lab only by minibus, 2,10 m. high, <u>charged to visitors</u> . In the final counting of the needed minibus, visitors must consider a guide each time they enter the underground lab.
General Rules	<b>Groups exceeding 23 participants</b> need to be split up in two successive turns: max 23 visitors in the first and max 23 in the second. In this case the visit will last about <b>3,5 hours</b> . If unable to make the visit it is compulsory to communicate it by fax, or else LNGS will have the possibility to claim the payment of the guide engaged for the visit. A well-bred behavior is fundamental for a good result of the visit as well as to not interfere with the working activity of the whole structure.

#### **The noncompliance of the above mentioned rules implies the prompt interruption of the visit.**

Since the temperature in the underground lab changes between 7 and 18 C, it is recommendable to wear windbreaker and comfortable shoes.

In order to favor visiting groups, we provide a list of transport companies located in the proximity of the LNGS. Guests need to contact **directly** the transport companies to reserve the minibus therefore the LNGS decline any responsibilities concerning misunderstandings related to the transport service.
